

Easy Mod Manager

How to install ?

- 1•** Setup will open automatically on the first start.
Choose your GTA V main directory, download or renew the latest components and decide if you want import your currently installed mods to the manager
- 2•** Start adding mods by clicking the "Add Modification" button.
Insert a short name and add the required modification files.
When finished, click on the submit button to add your modification.
- 3•** To create or remove new profiles, click on the "Profiles" header in
the menu bar.
You can add up to 10 profiles and switch between them
- 4•** To remove mods or edit them, just select them by clicking on the label
and click below on the specific buttons
- 5•** Use the checkboxes in the modification list to enable / disable the modification in the current selected profile
